SUBJECT INDEX TO VOLUME XXIV

(abs) = Abstract. (E) = Editorial. (B.R.) = Book Review

Abdomen, operation on, effect on mechanism of respiration (abs), 451
Abscess, acute hematogenous (metastatic) perinephric (abs), 708
subphrenic, 125; (abs), 218
Acromio-clavicular joint, tuberculosis of (abs), 95
Actinomycosis, cervicofacial, roentgen therapy (abs), 603
female genital (abs), 710
Adenomas, multiple malignant, of the kidney (abs), 330
Air swallowing, clinical features of (abs), 706
American Roentgen Ray Society, annual meeting, 194; (E), 434
commercial exhibit, 441
officers elected, 574
scientific exhibit, 438
Amniography, 363
Analytic field selector (abs), 345
Anemia, erythroblastic, roentgen findings (abs), 713
Aneurysm, erosion of vertebrae from (abs), 712
of horizontal aortic arch, 558
Angina pectoris, treatment of, by paravertebral short wave radiation, 163, 312
Angioendotheliomas about the jaws, 534
Aorta, aneurysm of horizontal arch of, 558
ascending, modification of procedure of measuring diameter of (abs), 451
coarctation of, (adult type) roentgen diagnosis, 349
pathologic, 154
Apparatus, diagnostic, check-up of time of exposure (abs), 344
roentgen, giving absolute safety against high tension currents, 573
Appendicitis, chronic, roentgen diagnosis, 631
chronic, segmental colitis an indirect sign of (abs), 591
Aqueous solutions, mechanism of chemical roentgen reactions in (abs), 345
Arteries, bronchial and pulmonary, experimental method for radiographic demonstration of (abs), 84
Artery, pulmonary, roentgen image of congenital stenosis of (abs), 583
Asthma, bronchial, roentgen therapy (abs), 472
incidence of sinusitis in children suffering from (abs), 450
Atelectasis: See Lungs, collapse
Azygos lobe: See Lungs

Bacteria, effect of cathode rays upon (abs), 348
effect of x-rays upon (abs), 347
Bacteriophage, effect of x-ray upon, and on bacterial organism (abs), 347
Banti's disease, attacks of hepatargia during roentgen treatment of (abs), 476
Basal metabolism, effect of roentgen irradiation on (abs), 346
Basedow's disease: See Goiter, exophthalmic
Beginnings (the): Egypt and Assyria. By Warren R. Dawson (B.R.), 579
Binoculars, reading of stereograms with aid of (abs), 345
Biotypy of skeleton (abs), 592
Bladder, management of new growths in (abs), 460
unusual type of lithiasis (abs), 460
Body, cavities of, campiodol in visualization of, 477
entire, new results of roentgenography of (abs), 713
Bone, chondrosarcoma of (abs), 466
diseases of, interpretation of roentgenogram in (abs), 330
echinococcic involvement (abs), 712
growing, lead line in, as roentgen sign of plumbism, 550
involvement of, in Hodgkin's disease (abs), 218; (abs), 219
lesions of, in tardive heredosyphilis, 234
metastases from cancer, analgesic effect of roentgen rays in (abs), 338
metastases, in mammary carcinoma, roentgen therapy of (abs), 334
roentgen characteristics of lesions of (abs), 94
roentgenologically demonstrable changes in Gaucher's disease, 258
small round cell sarcoma of (Ewing's sarcoma) (abs), 463
thyroid metastases in (abs), 465
Bones of leg, unusual congenital anomaly of (abs), 599
Book Reviews
Les Rayons Ultra-violets et Infra-rouges. By W. Vignal, 320
La Sensitométrie Cutanée. By J. Saidman, 320
The Effect of Roentgen Irradiation on the Interrelation between Malignant Tumors and Their Hosts. By Carl Krebs, 444
Experimental Studies on Roentgen Treatment of Malignant Tumors. By Jens Juul, 445
Die Radiumbehandlung in der Augenheilkunde. By Leo Kumer and L. Sallmann, 445
Medical and Surgical Year-Book of the Physicians Hospital of Plattsburgh, 446
Ergebnisse der medizinischen Strahlenforschung (Röntgendiagnostik, Röntgen-, Radium- und Lichttherapie). Volume IV. Edited by H. Holfelder, H. Holthusen, O. Jüngling, H. Martius and H. R. Schinz, 578

Normale Anatomie des Kopfes im Röntgenbild. By Karl Goldhamer, 578
The Beginnings; Egypt and Assyria. By Warren R. Dawson, 579
Das Ulcusproblem in Lichte moderner Röntgenforschung. By H. U. Albrecht, 694
X-Ray Crystallography. By R. W. James, 694
Radiumtherapie, Methoden und Aussichten. By F. Gudzent, 695
Ultra-Violet Radiations and Their Uses. By Robert Aitken, 695
BORDERLINE RAYS, mecapion for measurement of (abs), 111
treatment of skin diseases with (abs), 103
treatment results with, in dermatology (abs), 338
BOWMAN, WILLIAM B., an appreciation (E), 567
obituary notice (E), 567
portrait opposite page 567
BRAIN, calcifications of pia mater of, of angiomatous origin, demonstrated by roentgenography (abs), 324
demonstration of cisternae of base of, and its diagnostic utility (abs) 203
generalized pressure atrophy of, secondary to traumatic and pathologic involvement of Pacchionian bodies (abs) 324
BREAST, cancer, result of combined surgical and radiological treatment at Radiumhemmet (abs), 601
carcinoma, deep roentgen therapy, five year results, 673
carcinoma, results of roentgen therapy (abs), 341
carcinoma, roentgen treatment of metastasis to vertebrae and bones of pelvis from, 657
malignancy of, present status of roentgen therapy (abs), 104
roentgenologic study of, 113
BROMINOL-LIGHT, experiments with, on gall-bladder of dog, 634
BRONCHI, foreign bodies in (abs), 703
BRONCHIECTASIS (abs), 208
atelectatic (abs), 325
BRONCHOGRAPHY, studies on (abs), 85
BRONCHOLITHS (abs), 703
BRONCHOSINUSITIS DISEASE, a correction, 199
BROWN, RICHARD MARK, obituary notice (E), 568
BUCKY DIAPHRAGM, use of, in pulmonary roentgenograms (abs), 107
BUCKY RAYS: See Borderline rays
BURNS and cauterization of human skin, roentgen treatment (abs), 221
indirect roentgen, 310
BUSI'S ROENTGEN SIGN in ileo-ceco-colic invagination (abs), 454

CALCAREOUS SHADOWS in right hypochondrium (abs), 587
CALCIFICATION of pia mater of brain of angiomatous origin (abs), 324
of pleura (abs), 325
of vasa deferentia, case of almost total (abs), 591
partial, of articular capsule of shoulder, radiotherapy (abs), 102
CALCIFICATIONS, intervertebral (abs), 219
CALCIUM, shadows of, in region of soft tissues of neck (abs), 83
CALCULI, migrating, of ureter (abs), 591
CALDWELL LECTURE, 1930, 605
CAMPIODOL (iodized rapeseed oil) in visualization of body cavities, 477
CANCER: See also Carcinoma; Tumors, malignant, etc.
clinical evaluation of radium and roentgen therapy in advanced, with various combinations of wave lengths, 540
concerted action in fight against (E), 687
of breast, result of combined surgical and radiological treatment at Radiumhemmet (abs), 601
of cervix, résumé of work of subcommittee charged with study of radiotherapy of (abs), 603
of esophagus (abs), 324
of prostrate (abs), 461
of rectum, advantages and limitations of radiation in treatment (abs), 343
of rectum, inoperable, curietherapy with method of Neumann and Coryn (abs), 106
of skin, results of roentgen treatment (abs), 333
of uterus, chief point in struggle against (abs), 335
present status of roentgen therapy of (abs), 473
radiation treatment, 310
relative value of radium in treatment of, 180
CAPILLARY LINE in right lung field (abs), 583
CARCINOMA, buccal, radium treatment (abs), 470
cachexia, organotherapy with hipocids in (abs), 222
histochemical examinations of, before and after irradiation (abs), 336
mammary, roentgen therapy of bone metastases in (abs), 334
of breast, deep roentgen therapy, five year results, 673
of breast, results of roentgen therapy (abs), 341
of breast, roentgen treatment of metastasis to vertebrae and bones of pelvis from, 657
of cervix, complications in urinary tract due to, 47
of cervix, dosage of hard roentgen rays from distant fields in treatment (abs), 342
of cervix, investigation of relation between histological findings and results of radiation therapy (abs), 474
of cervix, results from treatment with radium and roentgen rays, 1915–1923, 54
of cervix, results obtained in treatment with radium and x-rays (abs), 343

of larynx, radiation treatment (abs), 337
of oral cavity, what is essential for successful for successful therapy (abs),471
of ovary, report of three cases treated by deep roentgen therapy, 63
of prostate, value of high voltage x-ray therapy (abs), 472
of stomach, early diagnosis (E), 563
of tongue, cured for six years by roentgen treatment alone (abs), 224
of uterus, treatment of, 412
primary, of the lung (abs), 209
rectal, radium treatment (abs), 473
roentgen, knowledge of, as occupational disease (abs), 473
roentgen studies of (abs), 223
Cardio-aortic shadow, variations of, due to obesity or emaciation (abs), 85
Cardiospasm (abs), 705
in new-born infant (abs), 453
Castration, roentgen histological study of uterine mucous membrane after (abs), 474
Cathode rays, effect of, upon certain bacteria (abs), 348
Cecum, abnormalities in position and size (abs), 217
stasis of, its clinical significance and relation to proximal colon stasis, 1
Central nervous system, effect of roentgen rays upon (abs), 340
Chest of new-born infant, roentgen appearance, 140
roentgenograms of, in nontuberculous children suspected of being tuberculous (abs), 701
Children, asthenic, motility of empty stomach in normal and malnourished (abs), 453
chest roentgenograms of nontuberculous, suspected of being tuberculous (abs), 701
intrabronchial injection of lipiodol in, by new technique (abs), 703
of rural district, percentage of latent tuberculosis and primary complexes demonstrable roentgenologically in (abs), 584
Chloroma, report of case with recovery following roentgen therapy (abs), 475
Cholecystitis, experimental production of an x-ray (abs), 107
Cholecystograms, unusual, and their interpretation, 516
Cholecystography, function of the gall-bladder and (abs), 586
in left lateroanterior position, 313
liver function and (abs), 587
study of 506 cases (abs), 327
with urologic examination for diagnosis (abs), 327
Cholesterin, destruction of, by roentgen rays in vitro (abs), 347
Chondrosarcoma of bone (abs), 466
Cin-ex camera, 575
Cisternae of base of brain, demonstration of, and its diagnostic utility (abs), 203
Coarctation of aorta (adult type), roentgen diagnosis, 349
Coccidioidal granuloma (abs), 101; (abs), 467
Colitis, segmental, indirect sign of chronic appendicitis (abs), 591
Colon, abnormalities in position and size (abs), 217
diverticula of (abs), 454
factors of error in roentgen diagnosis of diseases of (abs), 217
multiple diverticula of (abs), 328
multiple polyposis of (abs), 454
right diaphragmatic hernia of (abs), 588
right, roentgen picture of, in rapid emptying of stomach (abs), 454
studies on, cecal stasis; its clinical significance and relation to proximal colon stasis, 1
ulcer of, subphrenic pyopneumothorax from perforation of (abs), 588
Columbia paste, construction of apparatus of, for superficial radium therapy (abs), 101
Coolidge, W. D., portrait opposite page 189
Cor bovinum, differential diagnosis (abs), 584
Cranio-vertebral region, anomalies of (abs), 333
Cranium, fractures of, rôle of osseous structures in (abs), 450
roentgen diagnosis of space-narrowing processes in (abs), 582
Crouzon's disease, roentgen study of case of (abs), 582
Cystography in infancy and childhood (abs), 457

Dental caries as contributing factor in maxillary sinusitis (abs), 698
Dermatology, standardization of roentgen procedures in (abs), 103
Developmental disturbance, multiple, unusual form of the fingers, in adolescence (abs),96
Dextrocardia, congenital mirror picture, with situs transversus, patent ductus arteriosus and subacute bacterial inflammation (abs), 467
Diaphragm, eventration of (abs), 586
paralysis of left side of (abs), 214
right-sided relaxation of, 430
traumatic rupture of, 679
Digestive tract: See Gastrointestinal tract
Diverticula, cardiaproximal, of stomach, symptomatology and diagnosis (abs), 586
congenital, of duodenum (abs), 328
multiple, of the colon (abs), 328
of colon and appendices epiploica (abs), 454
of esophagus (abs), 215
pseudo, of antrum of stomach (abs), 589
Diverticulum, anterior, of esophagus (abs), 324
duodenal-jejunal, recognition of (abs), 88
in free duodenum (abs), 589
of duodenum perforated into pancreas, 684
of esophagus which developed rapidly (abs), 450
Dose, measurement of, and filtration of roentgen rays in skin diseases (abs), 468

Dosimeter, construction and calibration of standard, 72
Duodenum, chronic stasis of, observations in 24 cases (abs), 88
congenital diverticula of (abs), 328
diverticulum of, perforated into pancreas, 684
free, diverticulum in (abs), 589
papilloma of, roentgen diagnosis, 554
ulcer, roentgen examination of perforation of (abs), 589
ulcer, usefulness of roentgen signs in (abs), 328
Dyschondroplasia, bilateral, associated with osteogenetic exostosis of familial type (abs), 462
case of (abs), 597
Echinococcus cyst in bone (abs), 712
secondary, of the lung (abs), 585
Ectrodactylia, rare case of (abs), 96

Esophagus, anterior diverticulum of (abs), 324
barium enema entering, 300
cancer of (abs), 324
diverticula of (abs), 215
diverticulum of, rapid development of (abs), 450
idiopathic dilatation, genesis of (abs), 586
Ewing's sarcoma (abs), 463
tumor, nature of (abs), 464
Exostosis, osteogenetic, of familial type, associated with bilateral dyschondroplasia (abs), 462
Experimental Studies on Roentgen Treatment of Malignant Tumors. By Jens Juul (B.R.), 445
Eye, malignant tumors, treatment by radiation (abs), 223

Femur, diagnosis of impaction of fractures of neck of, by roentgenograms in three positions (abs), 332
Fibroangioma of nasal cavity, roentgen therapy (abs), 472
Fibromyoma, uterine (abs), 91
Films, danger of fire from (abs), 468
Fingers, unusual form of multiple developmental disturbance of, in adolescence (abs), 96
Fistula, biliary, lipiodol studies of postoperative (abs), 90
cholecysto-colic (abs), 327
jejuno-colic (abs), 326
of biliary tract, lipiodol roentgen diagnosis of (abs), 709
Foreign bodies in bronchi (abs), 703
of eye, simplification of graphic method of Grudzinski for localization of (abs), 698
Fractures, influence of roentgen rays on healing of (abs), 604
of cranium, rôle of osseous structures in (abs), 450
of hip (abs), 94
of neck of femur, diagnosis of impaction of, by roentgenograms in three positions (abs), 332
viewing of fluoroscopic reduction of, in two planes (abs), 714

Gall-Bladder, cholecystography and function of (abs), 586
effect of x-rays on (abs), 107
emptying of, following restoration from acute experimental cyolecystitis (abs), 709

improvement of roentgen demonstration, 573
roentgen-physiological studies on, 634
Gastrointestinal tract, compressor and selective apparatus for relief study of (abs), 87
relief studies of (abs), 87
roentgen examination of bleeding affections of, by means of hydrogen peroxide contrast suspension (abs), 591
roentgen picture of, in a case of chronic dyspepsia (abs), 215
syphilis, roentgen picture (abs), 589
Gaucher's disease, roentgenologically demonstrable changes in bone in, 258
Goiter: See also Thyroid
changes in form and size of heart in (abs), 704
exophthalmic, importance of radiotherapy in (abs), 474
exophthalmic, roentgen treatment (abs), 103
results of roentgen therapy, based on observations in 400 cases, 395
toxic, ten years' results with radium in treatment of, 280
Goulstonian Lectures on calcium and phosphorus (E), 303
Granger, Amedee, reception to, 441

Halogenated oils, employed in roentgenology, study of (abs), 604
Hand, rare case of congenital malformation of (abs), 592
Hands, destruction of terminal phalanges in both (abs), 96
multiple enchondromas of both (abs), 96
Headaches, menstrual, 267
Heart, change of form and size of, in struma (abs), 704
enlargement of (abs), 584
functional capacity of, roentgen characteristics (abs), 704
horizontal orthoprojection of (abs), 704
isography and cinematography of (abs), 86
new principle for determination of size of, and its practical application (abs), 213
orthodiagrammeter for radioscopic examinations of (abs), 86
"Hemato-encephalic barrier," roentgen rays and (abs), 340
Hematoma, dissecting, of phrenic nerve, with anomalous enlargement of liver, 38
Hemorrhages, genital, roentgen study of sella turcica in (abs), 203
subcutaneous or mucous membrane, radium in treatment of diseases with (abs), 103
Hepatargia, attacks of, during roentgen treatment of Banti's disease (abs), 476
Hernia, diaphragmatic; phrenic nerve stimulation under fluoroscope as an aid in diagnosis (abs), 214
of stomach through esophageal orifice of the diaphragm (abs), 86
right diaphragmatic, of colon (abs), 588
roentgen examination of (abs), 328
Hickey, Preston M., honored, 199
notice of death of, 569
Hip, complicated traumatic dislocation of (abs), 599
congenital dislocation of (abs), 332
congenital dislocation of, diagnosis and early treatment (abs), 100
fractures of (abs), 94
Hodgkin's disease of bone (abs), 219
of the lungs (abs), 209
radiotherapy of (abs), 600
with involvement of bone and skeletal muscles (abs), 218
Hospital, modern, radiation service in (abs), 468
Humerus varus (abs), 592
Hydatid cyst of lungs, two cases (abs), 702
Hydrogen peroxide contrast suspension, roentgen examination of bleeding affections of gastrointestinal tract by means of (abs), 591
Hypochondrium, right, calcareous shadows in (abs), 587

Ileum, tumors of terminal loop of (abs), 590
Impetigo herpetiformis, roentgen castration in (abs), 334

massive collapse of (abs), 325
massive collapse, pulmonary embolism and (abs), 451
neoplasms of (abs), 452
postoperative complications and bronchial obstruction (abs), 702
primary carcinoma of (abs), 209
right field of, capillary line in (abs), 583
secondary echinococcus of (abs), 585
syphilitic infection of, 427
tumors, diagnosis in the adult (abs), 585
use of Bucky diaphragm in roentgenograms (abs), 107
LUPUS VULGARIS, treatment of (abs), 336
LYMPH NODES, calcified, in mesentery, clinical study (abs), 218
LYMPHOGRANULOMATOSIS, irradiation of (abs), 338
prognosis of (abs), 101
LYMPHOID TISSUE, reaction of, to roentgen radiation, 42
LYMPHOMATA, blood changes in, and bearing on roentgen therapy, 648

MARBLE BONES, contribution to knowledge of (abs), 95
development of, 147
MARIE'S DISEASE (abs), 598
MEASUREMENT of penetrating radiations, technique (abs), 110
MEASUREMENTS in radiation protection (abs), 109
roentgen, rôle of large and small ionization chamber in (abs), 111
MECAPION for measurement of borderline rays (abs), 111
MEDICAL and Surgical Year-Book of the Physicians Hospital of Plattsburgh (B.R.), 446
MEDICOLEGAL judgment on roentgen injury after epilation (abs), 336
testimony, difficult case of (abs), 467
MENSTRUATION, headaches of, 267
MEGA-ESOPHAGUS, case of (abs), 324
MENOPAUSE, curietherapy of hemorrhagic metropathy of (abs), 474
MESENTERY, calcified lymph nodes in, clinical study (abs), 218
METABOLISM, calcium and phosphorus, Goulstonian Lectures on (E), 303
tissue, effect of roentgen and radium radiation upon (abs), 220
METATARSAL BONE, first, isolated aseptic necrosis in epiphysis of (abs), 710
METROPATHY, hemorrhagic, of menopause, curietherapy (abs), 474
METRORRHAGIA, essential, pathogenesis and roentgen treatment in young subjects (abs), 106
MIKULICZ SYNDROME, treatment by irradiation, 491
MIKULICZ'S DISEASE, and the Mikulicz syndrome (abs), 100
treatment by irradiation, 491
MINNESOTA RADIOLOGICAL SOCIETY 693
MITRAL LESIONS, roentgen and clinical study of relation between pulmonary tuberculosis and (abs), 585

Morbus basedowii: See Goiter, exophthalmic
Morison, J. M. Woodburn, appointment of, as Professor of Radiology, University of London (E), 434
Mouth, carcinoma, radium treatment (abs), 470
carcinoma, what is essential for successful therapy (abs), 471
Mucocele of appendix and cecum, recognition of (abs), 88
Mycosis, osseous, roentgen study of case of (abs), 94
